Profile Summary

Final-year Computer Science student with 11 months of hands-on experience as a Software Developer Intern at Innova Solutions. Skilled in full-stack development using .NET Core, MERN Stack, and Flask, with a strong foundation in Data Structures, OOP, and scalable system design. Proven ability of building production-level applications, optimize backend performance, and deliver high-impact solutions. Received a full-time offer based on performance.

Technical Skills

- **Programming Languages:** C#, Java, Python, C
- **Frontend:** React.js, Angular, JavaScript, Tailwind CSS, Bootstrap
- **Backend:** ASP.NET Core, Node.js, Express.js, Flask
- **Databases:** Microsoft SQL Server, PostgreSQL, MySQL, MongoDB
- **Tools & Technologies:** Git, GitHub, REST APIs, JWT Authentication, CI/CD, Entity Framework
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Networking

Experience

Software Developer Intern: Innova Solutions – Hyderabad May 2025 – March 2026

- Designed and deployed 50+ RESTful APIs using .NET Core, C#, and Entity Framework, improving backend performance by 40% in a production environment.
- Implemented secure role-based access control and JWT authentication, reducing unauthorized access issues by 40%.
- Optimized SQL queries and database operations in Microsoft SQL Server, improving data retrieval time by 25%.
- Collaborated in Agile sprints, code reviews, and CI/CD pipelines, reducing deployment errors by 15%.
- Contributed to scalable enterprise application development, ensuring high performance, maintainability and clean architecture.
- Received full-time offer (PPO) based on performance.

Projects

Travelopia: Tour and Travel Website (MongoDB, Express.js, React.js, Node.js) Nov 2024

- Developed a full-stack travel booking platform using MongoDB, Express.js, React.js, and Node.js.
- Built 20+ responsive pages with 15+ user features including booking, cancellations, wishlist, and reviews.
- Designed admin dashboard with CRUD operations for tours and user management.
- Integrated recommendation system for personalized tour suggestions.

CollabSphere: Influencer-Sponsor Collaboration Platform (Flask, Python) July 2024

- Built a full-stack platform using Flask with role-based dashboards for influencers, sponsors, and admins.
- Implemented AI chatbot for automated user interaction and query handling.
- Developed content-based matching system using cosine similarity for influencer-sponsor recommendations.

Achievements

- **AI Innovation & HackQuest:** Secured 1st place in a 24-hour hackathon among 30+ teams by leading a team of 4 to resolve 25+ critical application issues, significantly improving performance and user experience under tight deadlines.
- Internship converted into full-time offer based on consistent high performance.

Education

Bachelor of Engineering: Chitkara University - Computer Science Sept 2022 – June 2026

- **Relevant Coursework:** Data Structures & Algorithms, DBMS, Operating Systems, Networking, Full Stack Development.
